LEARN LE

A NYMIR MEMBER BENEFIT

NEOGOV's learning management system promotes employee training with a user-friendly tracking system for Human Resources, department heads, supervisors, and employees. LEARN eliminates the administrative burden of managing multiple employee training programs by providing a centralized online platform, designed for the specific needs of governmental entities. Discrimination and Harassment, Workplace Violence, and Cyber Awareness are just a few of the invaluable classes available.

Policy Management
Upload your policies, visible only to your entity's employees - users read, learn, and agree to your policies; admins track, verify, and pull reports.

Resource Management
All employees with a login will have access to safety manuals, alerts, checklists, forms, video clips, and much more.

Assignment Feature
Members can choose to assign specific policies, courses, and/or documents to their employees with or without deadlines. Employees visit their training page and see their specific assignments.

Administrative Dashboard
Members may track employee assignments via an administrative dashboard, or view a group of employees to see how they're progressing toward a goal or deadline.

OVER 400 FREE ONLINE COURSES!

TRAIN 24/7
